1. Revenue Summary

1.1 Affiliate Commission (Dognet, CJ, etc.)

Note: Direct Partner commission distribution is NGO tier-dependent (Base: 40%, Rising: 50%, Legend: 60%); therefore the amounts shown here are the sum of varying ratios per transaction. The summary row contains the total amount actually allocated to NGOs across all transactions.

Item	Amount (HUF)
Gross affiliate commission (Dognet ledger)	–
Platform fee (remaining portion — depends on NGO tier: Base: 60%, Rising: 50%, Legend: 40%)	–
Amount directly allocated to NGOs (40–60% depending on tier + user donation multiplier effect, weighted average)	–

 **Note for the report preparer:** For Direct Partner transactions, 40% (Base), 50% (Rising), or 60% (Legend) goes to donation depending on the NGO tier. For transactions coming through the affiliate network (Dognet), the ratio depends on the affiliate agreement terms. The summary row should contain the amount actually

allocated to NGOs; the platform fee row should contain the remainder. (Cf. *Terms of Service §4.1.2(b) and §8.1.*)

```

Total NGO distribution:

```
ngo_total = ngo_direct_donation + ngo_common_pool_share
```

Where: - `ngo_votes` = the number of valid votes cast for the given NGO in the quarter - `total_valid_votes` = total valid votes (after dispute correction) - `total_pool_amount` = Common Donation Pool (Impact Amplifier 50% + a portion of Impact Challenge advertising revenue, after corrections) - `NGO tier ratio` = Base: 40%, Rising: 50%, Legend: 60% (*Terms of Service §4.1.2(b)*) - `donation multiplier` = Basic $\times 1.00$ – Legend $\times 1.25$ (*Terms of Service §4.1.2(c)*)
